To whom it may concern:

XM Satellite radio has become an important tool to keep me up-to-date for local weather and traffic while on the road. I found the local stations simply didn't offer the music content I was looking for. XM is worth every penny and I would NEVER give it up. It is unfortunate that the National Association of Broadcasters attempts to dictate what I am to listen to. Please reject the NAB's petition 04-160 and allow the best thing that has ever happened to radio to continue, XM that is!
